ClearStream...The Clear Choice™

ClearStream is a portable clear Bag bin system that adapts to many different recycling environments. The clear bag shows people “what goes where”. If it looks like a trash can, it will be used as a trash can! Our ClearStream customers report 0-3% contamination using the ClearStream bins.

ClearStream is the proven choice of thousands of professionals: schools, colleges & universities, cities & towns, non profits, event managers for fairs & festivals, waste haulers, corporations, military, property managers, transportation centers, etc.

ClearStreams' design has made it the most successful portable recycling container on the planet for these reasons:

- ClearStream requires minimal storage space and is easily transported
- Peaked lid with a restricted opening shows people what belongs in the bin
- Patented Bag lock keeps bags secured under ALL conditions
- You can open the frame, add a bag and snap on the lid in under a minute!
- No power-washing or messy clean-up required -- just replace the bag
