## **ClearStream Transporter**

The ClearStream transporter is a heavy duty Blue powder coated frame. It has four 8 inch wheels for uneven terrain and lock in the front. It is easy to use and move with just one person.

It holds 20 ClearStream frames, along with lids and bags (Sold separately).

### **Specifications**

- Dimensions: 36 in x 23 in x 44 in
- Powder coated blue steel
- 8" wheels (the front two are locking)
- Holds 20 units with lids and bags
- Easy to store

*“Before what took multiple trips with major gas use and a lot of labor, can now be handled in one trip and with a smaller crew.”*

*“Crews can keep the transporters on site and use them as service vehicles without any additional transportation. The labor and transportation savings alone pay for the transporter after a couple of events.”*

*“ClearStream is already the safest container because it eliminates heavy lifting. With the Transporter, one person can set up 20 ClearStreams in a single trip and never lift more than 10 pounds.”*
