SortMAX™

S.M.A.R.T. Recycling Centers

ClearStream Provides a 20/20 Customer Experience

ClearStream – the Clear Choice™ –

Shows visitors what's in containers, even from 20 feet away. When they see recyclables piling up in the bins, they add their own with virtually no contamination and plus 90% recyclables.

Getting Started

- 1 Identify the available recyclable materials in your collection environment.
- 2 Use the order form inside or call to place your custom order.
- 3 Order optional banners to create advertising opportunities. ClearStream will design and produce your custom displays that educate, create revenue, and provide internal messaging. Design services available for \$75 per hour.

Single Banner:

4' x 3' Banner Provides 12ft² of Display Space.

2-Bin Sort

To order a SortMax-2, choose:

- Two standard Hot Stamped lids
- Four rolls of 40" x 45" bags
- Five per roll, total 20

A Great Fit:

Narrow 17.25" depth makes SortMax a great fit for most locations. (48" x 17.25" x 42.25")

Locking Casters:

5" commercial grade casters are securely locked with toe brake.

Double Banner:

8.5' x 3' Banner Provides 25ft² of Display Space, or 50ft² if Double-Sided.

3-Bin Sort

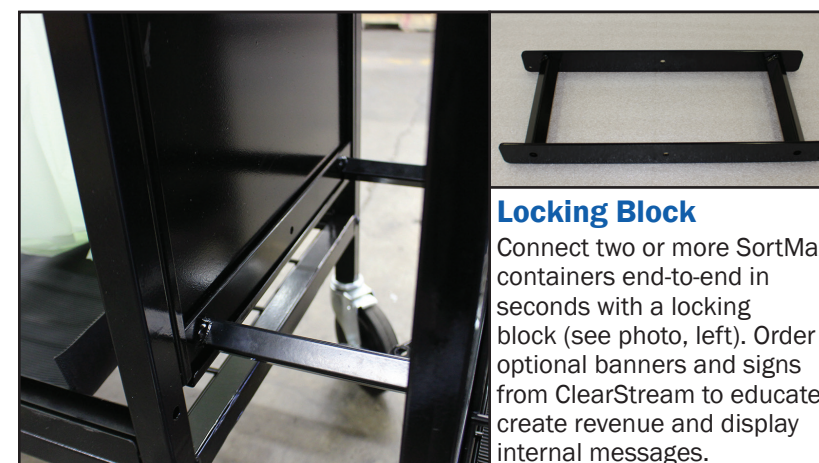

To order a SortMax-3, choose:

- One Hot Stamped lid and One black DualStream lid
- Two decals per opening, total 4
- Ten [10] 40" x 45" bags and Twenty [20] 30" x 45" bags

4-Bin Sort

To order a SortMax-4, choose:

- Two black DualStream lids
- Four different decals, total eight
- Four rolls of 30" x 45" bags [10 per roll], total 40 bags

Locking Block

Connect two or more SortMax containers end-to-end in seconds with a locking block (see photo, left). Order optional banners and signs from ClearStream to educate, create revenue and display internal messages.

Material Cart:

SortMax is also useful as a cart for bulk materials. Removing the lids and bags from your SortMax helps collect corrugated and other bulky materials. Each SortMax comes with a steel frame to hold a banner or signs.

How to set up SortMax in 5 minutes

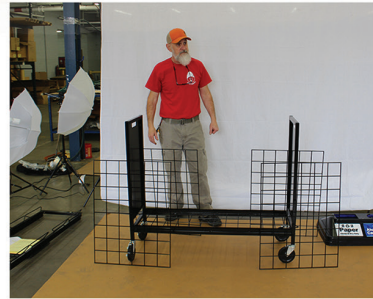

Step 1

Lay the units on the ground as shown and insert the longer 4 screws from the outside to attach the side panels to the bottom.

Step 2

Turn SortMax upside down to insert the wheels: use a small tool and hammer to secure; then turn SortMax right side up.

Step 4

Place 2 grids loosely into the single, front channel and 2 grids loosely into the separate back channels.

Step 4

Add the top panel, making sure to insert the two front grids into the single channel. Insert the shorter screws from the inside out and loosely tighten the front side

Step 5

Raise the top slightly to insert the back grids into the double channels. Complete the assembly by inserting the last two screws from the inside into the side panel.

Step 6

Then use the provided tool to tighten the 8 screws. Finally place the black spill guard rubber mat inside the SortMax. **YOUR READY TO ROLL.**
